

4 players in a bar.

Cel shaded/cartoon. Mainly only effects/particles

Gameplay loop: Take orders, pour pints, restock the bar, change the kegs, order stock, pay the bills. Upgrade the bar.

Physics glasses. Can break via moving them too fast and hitting something, dropping them, another player walking into them/ you and you dropping it.

Little steps to reach the bar and see over it (players are dwarves)

A customer comes in, orders a drink/ snack, the player grabs a glass and pours the drink/gets the snack, place it on the bar in front of the customer. The customer pays and leaves a tip based on efficiency and if the drink has enough liquid in it. Either cash gets placed on the side and has to be collected/placed in the register. or automatically added to money.

Other challenges include having to change the kegs. Must make sure it's empty otherwise beer goes everywhere! Kegs would either line up with beer type, or specific t-bar. Beer going everywhere causes a wet floor. Ragdolling players until cleaned or left and makes it sticky. Reducing movement speed.

If a keg runs out, you can recycle it for money. Players would have to lug a keg up the stairs and out back to recycle it. "buy keg button" in the cellar will drop a keg (or maybe a conveyor) so players can move them into a better area to store it or replace it. (dropping the keg might be funnier as it can land on a players head or also pile up). Fresh kegs are heavier than empty ones.

Guests will drink their beers at a table and set it down once finished. The players will take these dirty glasses and wash them in the dishwasher (or reuse them but that will result in less money). You can take glasses off guests but they might get angry so you'd have to fight them.

Another challenge are robbers (maybe goblins) that try to steal money. Players can buy a weapon to help with this or all work together and beat up the goblin.

At the end of the day, the bell is rung and the players can finish serving the last customer at the bar (if there is any). The next day starts and the timer is frozen. Bills are either paid automatically (might be easier for the player and also gives them something to not have to remember to do each day) or manually. Leftover money can be used to buy upgrades to the bar or items or saved. Quota raises each day but so do prices (inflation lol)

Glasses, kegs, and snacks are available to buy whenever.

Upgrades to buy:

Security - reduces chance of a robbery

Keg lift - transports the kegs out of the basement to the back where players can put it out to recycle it.

Lower the bar/one big step around the whole bar - Unsure which direction would be better

More lines - more beer lines to pour beer from. Also means an extra slot for kegs. (kegs only flow to their specific line)

Fruit machine - gambling. Doesn't bring the pub any income but players can use it as a last resort.(hit it with a bat to change the outcome)

Unbreakable glasses - glasses that don't break

Faster dishwasher

PlayerCharacter:

First person.

Wasd space controls.

Right click and hold to pick up.

Left click to attack.

E to interact

Menu screen:
